Voice job — States, retries and recovery

Legend

start · active state · terminal success · failure / exit

Claim and retry

• 450 s lease; five attempts. Transient retries: 2/4/8/16 s. Fifth transient failure: transient_exhausted.

Notification keeps status

• Set notified_at + notification_outcome. Five attempts. edited/replied: delivered. blocked/given_up: undelivered.

Recovery sweep — 60 s

• Re-enqueue stale/unnotified rows. After five attempts: queued or lease-expired processing becomes failed(stuck). Permanent errors and soft timeout also fail.
